

Kayla Knight

Atlanta, GA | 470-662-6691 | kaylaknight385@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Full Stack MERN Software Engineer with a unique background in end-user support, technical troubleshooting, and client relationship management. Combines hands-on experience in system administration and data optimization with comprehensive knowledge of modern web development. Proven ability to bridge technical and business needs, translating complex requirements into scalable, user-focused applications. A proactive problem-solver who thrives in collaborative environments, now aiming to leverage these client-focused technical skills to build and optimize intelligent, scalable systems in cloud engineering and AI.

TECHNICAL SKILLS

Frontend: JavaScript, React, HTML5, CSS3, Bootstrap, Tailwind

Backend: Node.js, Express.js, MongoDB, RESTful APIs

Tools: Visual Studio Code, Git/Github, Linux Command Line, SQL, noSQL, Bash

Databases: MongoDB, SQL, Database Design, Customer Relationship Management (CRM), Learner Management System (LMS)

EDUCATION

Per Scholas | Atlanta, GA | Full Stack Engineer | Oct 2025 - Feb 2026

University of West Georgia | Carrollton, GA | Aug 2019 - May 2020

Bachelors in International Business/Economics

Completed 20 course hours

EXPERIENCE

Student Success & Technology Advisor

Ultimate Medical Academy | Oct 2024 - June 2025 | Remote, Atlanta, GA

- Engineered automated data tracking solutions using Excel macros and formulas to monitor 100+ student accounts, reducing manual reporting time by 60%
- Analyzed student engagement metrics and performance data to identify at-risk students, improving retention rates through data-driven interventions
- Developed SQL queries to extract and transform LMS data for comprehensive academic progress reports
- Built custom dashboards consolidating student interaction data (40-100 daily touchpoints) across multiple platforms for real-time monitoring

- Optimized database queries within the Learning Management System to improve performance and reduce load times

Data Integrity Analyst

Accenture | Contract Feb 2023 - May 2024 | Remote, Atlanta, GA

- Collaborated with engineering teams to establish data governance policies and normalize database schemas.
- Created technical documentation detailing data pipelines, transformation logic, and quality assurance procedures.
- Developed and documented procedures to identify critical customer and system issues within our service ticketing and time-tracking software.
- Built comprehensive reporting dashboards analyzing service ticket trends.

Technical Support Engineer

AmerisourceBergen · Contract | May 2022 - Feb 2023 | Remote, Atlanta, GA

- Analyzed system logs and application data to identify root causes of recurring technical problems, reducing repeat incidents by 30%
- Maintained detailed documentation in ticketing system databases, creating queryable knowledge base with 200+ solutions
- Developed standardized troubleshooting scripts and procedures that improved first-call resolution rates by 40%
- Performed data migration and validation tasks during system upgrades affecting 1,000+ user accounts

Account Coordinator

Medernix | Full-time Jun 2021 - Jan 2022 | Sandy Springs, GA (On-site)

- Diagnosed and documented technical issues using the Customer Relationship Management system with a 95% resolution rate
- Updated internal databases with account information to maintain concise, clear records.
- Improved office operations by automating client correspondence, record tracking, and data communications.
- Monitored and analyzed customer feedback to identify opportunities for improvement.
